

ROULETT

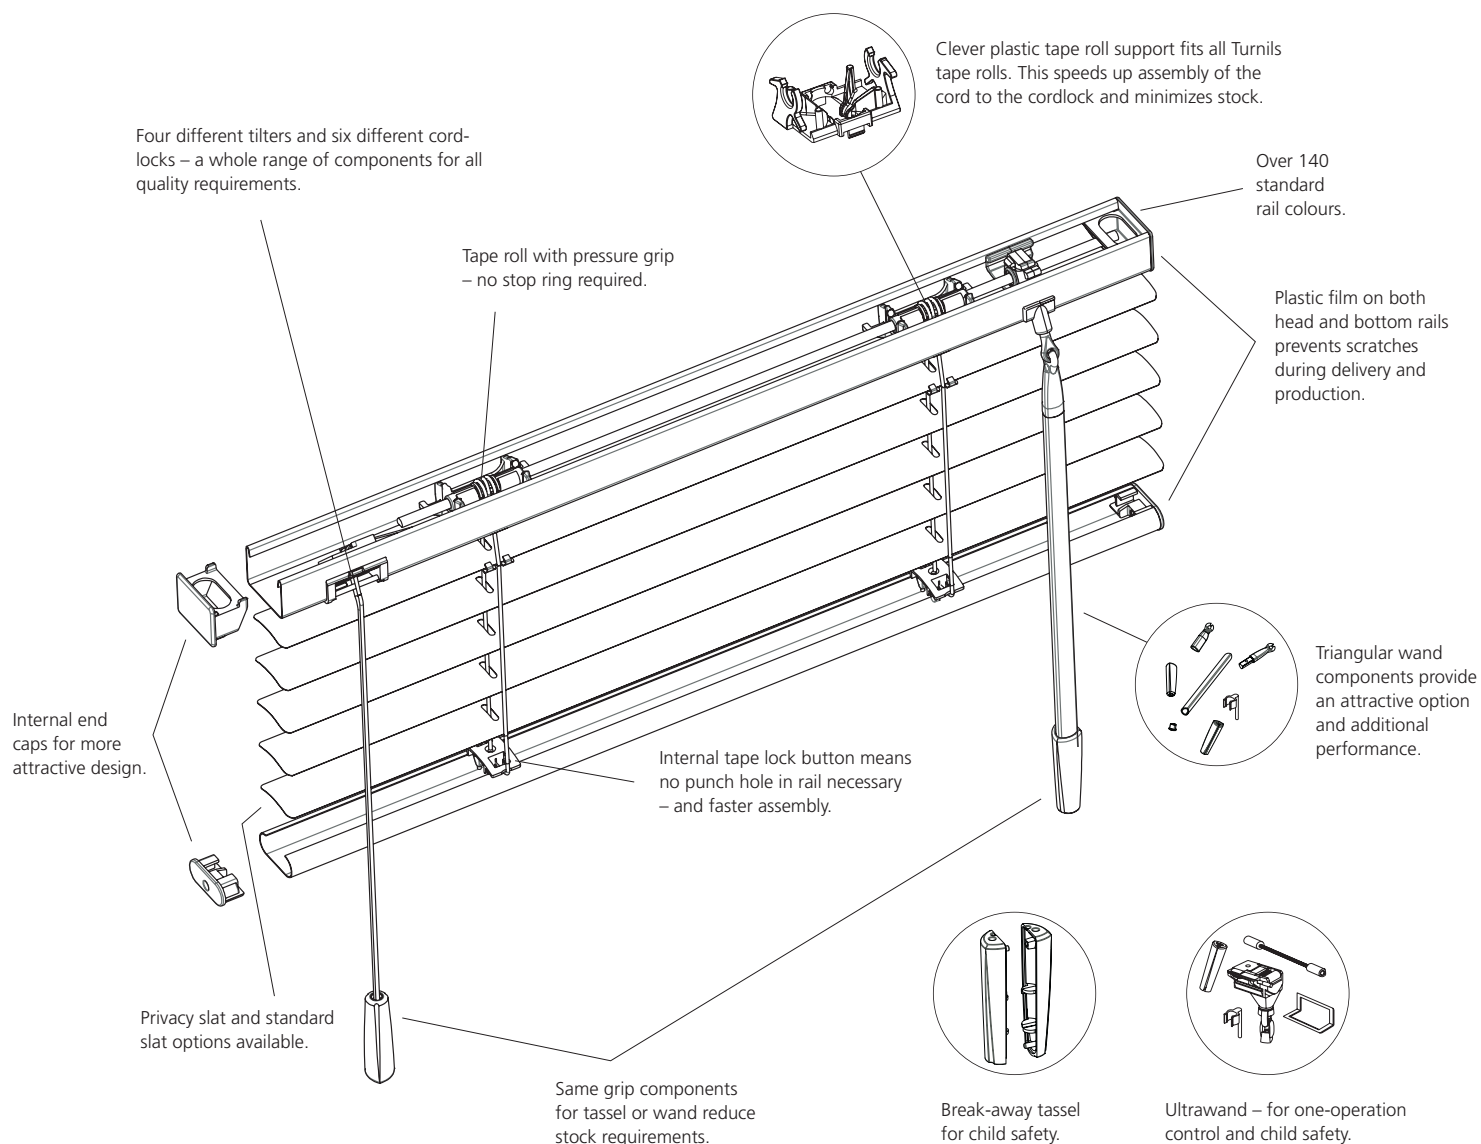

Proven 15/16/25/35 mm venetian blind system – an optimized product for volume sales

Roulett is a blind of proven quality, continuously updated over the years to remain a best-seller. With over 200 standard slat colours, and colour-matched rails and stringtapes, Roulett is an attractive and flexible system. Suitable as a free-hanging or in-between glazing blind, the system covers all applications using 15,16, 25 and 35 mm slats.

Clever design, cost-efficient components and reliable handling routines help streamline production, cut costs and reduce stock. For example, a new tape roll support speeds up assembly of the cord to the cordlock. An internal tape lock button means no punch hole is necessary in the bottom rail leading to faster assembly and a reduction in the number of tools needed. And a plastic protective film on the head and bottom rails prevents scratches during handling and delivery. This reduces both claims and scrap.

Roulett's design makes installation quick and easy in nearly every type of window. The system has the appropriate brackets and hooks to ensure the blind looks perfect in the installed position – and stays that way.

Sizes

Maximum width: 3000 mm (9' 10")

Maximum height: (9' 10")

Maximum area: 8.0 m² (86 sq ft)

Installation

Free-hanging

Swivel brackets and box brackets (both steel and plastic)

In-between glazing

Installation brackets and installation hook brackets
